Office Action Summary

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a method for applying drywall mud to drywall tape, classified in class 427, subclass 430.1.
 - II. Claims 13-20, drawn to an apparatus for applying drywall mud to drywall tape, classified in class 118, subclass 400.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group II can be used to perform a materially different process other than that of Group I, such as applying another fluid material, which is not drywall mud, for instance sizing or water or paint, to another continuous substrate, which is not drywall tape, for instance paper or cloth.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search for one group is not required for the other group(s), restriction for examination purposes as indicated is proper.
4. A telephone call was made to Peige Wise on May 2, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1762

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
